PROFESSIONAL SUMMARY

Software Engineer with 1+ years of professional experience building full-stack applications in Java/Spring Boot and C#/.NET, plus Next.js/React products through my own studio, Peak Status. AI-driven by default: I plan with Claude Code and execute with Codex, guided by agents.md and design.md files so AI-generated code follows real project standards, then review and test every change by hand. Built AI-integrated tools, including an internal operations platform with MCP-based task automation, and have a machine learning background in Python (Keras, scikit-learn, CNN). Also a UI/UX and web designer, so I deliver both the interface and the code behind it.

TECHNICAL SKILLS

AI & Machine Learning: AI-Assisted Development, Agentic Coding Workflows, Prompt Engineering, Context Engineering (agents.md, design.md, reusable skill files), Model Context Protocol (MCP) Tool Integration, Claude Code, OpenAI Codex, GitHub Copilot, Cursor, ChatGPT, Claude, Machine Learning (Keras, scikit-learn, CNN)

Languages: Java, C#, Python, SQL, C/C++, Go, PHP, JavaScript, TypeScript

Backend: Spring Boot, ASP.NET Core Web API, Hibernate, JPA, .NET, RESTful API Development, Microservices

Databases: PostgreSQL, MySQL, SQL Server, Supabase, Firebase

DevOps & Tools: Docker, Kubernetes, Jenkins (CI/CD), Git, GitHub, ClickUp

Web: HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Angular, Vue.js, WordPress, Elementor, Webflow, Wix

Design & Motion: Figma, Canva, Adobe Photoshop, Adobe Illustrator, CapCut, Remotion (programmatic motion graphics), Lucidchart (UML)

WORK EXPERIENCE

Accenture May 2025 - Present

Software Engineer | Spring & Java Developer

- Completed intensive enterprise training covering Java, Spring Boot, C#, .NET, Angular, React, and JavaScript across backend development, API design, and cloud fundamentals.

Java & Spring Boot Development: CIO Legal Internal Project

- Design and develop RESTful APIs with Spring Boot for Accenture's internal CIO Legal platform within an Agile Scrum team.
- Apply Hibernate and JPA for object-relational mapping and data persistence, working with PostgreSQL and MySQL.
- Containerize backend services with Docker and support deployment and orchestration with Kubernetes for consistent environments.
- Support Jenkins CI/CD pipelines to streamline builds and integration and reduce manual deployment effort.
- Proposed engineering process improvements around AI coding agents and an agents.md-style configuration standard, so team conventions and rules are written once and followed by every AI-assisted change.
- Participate in sprint planning, stand-ups, and retrospectives while following clean architecture, coding standards, and Git-based workflows.

C# & .NET Development

- Built and integrated RESTful APIs using C# and ASP.NET Core Web API, backed by SQL Server.
- Collaborated with frontend developers on Angular-based interfaces for API integration and feature delivery.

Peak Status 2026 - Present

Co-Founder | Full-Stack Developer & UI/UX Designer

- Co-founded Peak Status (peak-status.com), a Cebu-based creative and digital growth studio, working as full-stack developer and UI/UX designer on client projects.
- Use Claude Code and Codex on most projects: Claude Code for planning and architecture, Codex for execution. Start with the design, then write design.md and agents.md files so AI output stays consistent, and review and test everything before it ships.

- Built Peak Status OS, an internal operations platform with weekly sprint boards, a customizable Kanban, project tracking with automatic completion, a client directory, a shared calendar, team workload views, and admin/member accounts.
- Added AI task automation to Peak Status OS through MCP tools (read options, search tasks, create up to 100 tasks per batch) with a preview and user confirmation step and duplicate-request protection.
- Built Lime, a court booking web app for tennis, pickleball, and other sports or events, using Claude Code.
- Led development of the QR-FBS Digital Technology Simulation Kit (QR-FBS-DTSK) for Lazi Technical Institute, a web simulation platform with CRM and Reservation Management modules, using Next.js, React, TypeScript, and Supabase/PostgreSQL.

Pixel8 Web Consultancy Inc July 2024 - August 2024

Full Stack Developer Intern

- Developed and maintained backend architecture for the CQFS project and integrated server-side logic with front-end elements.
- Reviewed and audited colleagues' code for best practices, and contributed to secure APIs and security measures.
- Promoted to a Quality Assurance role, testing code to find bugs, improve performance, and ensure reliability.

Freelance October 2019 - Present

Web Designer & UI/UX Designer

- Design branding, social media creatives, marketing graphics, and UI/UX in Figma, Canva, Photoshop, and Illustrator.
- Build and modify websites in WordPress, Elementor, Wix, and Webflow, with custom HTML, CSS, and JavaScript components.
- Create video and motion content with CapCut and AI-assisted tools.

AI-DRIVEN & SELECTED PROJECTS

- **Lime, Court Booking Web App (Claude Code):** Designed first, then planned in Claude Code and built with design.md and agents.md guidance for consistent output.
- **Motion Graphics Video (Remotion + Claude):** Produced a full motion graphics video by prompting Claude to generate Remotion (React) animation code, directing the concept, style, and timing myself.
- **TheNotesAI:** Built an AI-focused notes application (frontend on GitHub: github.com/JohnCadungog/thenotesAI_frontend).
- **ElevateMe (Python, Django, React):** Worked on frontend development and AI prompt engineering.
- **Expense Tracker Backend:** Personal finance and budgeting backend designed for future AI-powered recommendations (github.com/JohnCadungog/expense-tracker-backend).
- **Bird Bone to Bird Classification (Python, Keras, scikit-learn, CNN):** Built a CNN classifier that identifies a bird from its bone measurements, tuning hyperparameters to reach about 98% accuracy.
- **Other:** EcoSwap (Android, Java, Firebase); Escafe, a responsive coffee landing page; Code Language Interpreter (Java: lexer, parser, tokens); RSCPU Simulator (Java); 2D Plane Game (C#).

EDUCATION

Cebu Institute of Technology - University 2020 - May 2025

Bachelor of Science in Computer Science | First Year Parangal Awardee

CERTIFICATION

Competency Certification in Backend Development, Pixel8 Web Consultancy Inc
